

One question. One click. One clear status.

NIS2 and ISO 27001, step by step and without spreadsheet chaos. For mid-sized companies and public bodies.

NIS2

ISO 27001

EU AI Act

ISO 42001

Cyber Resilience Act

The image displays the UniqSuite Management dashboard for Nordwerk Energie GmbH (Demo). The dashboard provides an executive overview across all phases and frameworks, showing a 59% security posture with a 'making progress' indicator. It lists overdue tasks and critical requirements for NIS2, ISO 27001, and ISO 42001. A framework compliance section shows progress for NIS2 (60%), ISO/IEC 27001, EU AI Act (46%), and ISO 42001. A welcome modal on the right guides the user through three steps: Company, Package, and Size, with a list of frameworks to demonstrate.

Management dashboard
Executive overview across all phases and frameworks.

You are 59% prepared. These points need your attention:

- Overdue by 31 days: Backup-Restore-Test wiederholen (ISO 27001)
- Overdue by 16 days: Management-Review ISMS/AIMS durchführen (ISO 27001)
- Overdue since today: NIS2 - Early warning (NIS2)
- 18 critical MUST requirements open — ISO 27001
- 11 critical MUST requirements open — NIS2
- 11 critical MUST requirements open — ISO 42001

Framework compliance

Framework	Controls	Applicable	Implemented	Partial	Not implemented	Progress
NIS2	268 controls	241 applicable	97	94	50	60%
ISO/IEC 27001	318 controls	315 applicable	140	110		
EU AI Act	130 controls	108 applicable				46%
ISO 42001	111 controls	107 applicable				

Welcome to UniqSuite
Three questions, then you're ready.

1 Company 2 Package 3 Size

What do you need to demonstrate?

- ☒ NIS2
Legal duty for important and essential entities.
- ☐ ISO 27001
Certifiable information security management system.
- ☐ NIS2 + ISO 27001
Both together — identical requirements are assessed once.

In addition (optional)

- ☒ EU AI Act
- ☐ ISO 42001 (AI management system)
- ☐ Cyber Resilience Act (products with digital elements)

— WHY UNIQSUITE

Compliance can be simple. It just has to be clear.

Germany's NIS2 Implementation Act has applied since December 2025. Management must implement and oversee the measures and needs a status it can understand. UniqSuite turns hundreds of requirements into a guided path.

Simple

Ready in three questions. Then one requirement per card, answered with a click: implemented, partial, not implemented.

Assess once

Equivalent requirements from NIS2, ISO 27001, the AI Act, ISO 42001 and the CRA share one answer. No duplicate work, no contradictions.

Audit-ready

Statement of Applicability, board, risk and implementation reports as PDF, Word or Excel, at the push of a button.

3

questions to your first assessment

910

assessable requirements in five frameworks

— ONE TOOL, FIVE FRAMEWORKS

Today NIS2 and ISO 27001. Tomorrow AI and products.

NIS2 BSI Act 268	ISO 27001 ISMS 318	AI Act AI Regulation 130	ISO 42001 AI management 111	CRA Products 83
--------------------------------------	--	--	---	-------------------------------------

Assessable requirements per catalogue. AI Act deadlines reflect Regulation (EU) 2026/1744.

— TRUST

- ✓ **Tenant separation in the database.** Row-level access rules keep every organisation's data apart.
- ✓ **Daily backups** with 14-day retention.
- ✓ **German and English** interface and reports.
- ✓ **Two-factor sign-in**, optionally mandatory for administrators.
- ✓ **Rule-based, not a black box.** No AI decides your compliance status.
- ✓ **Built by practitioners:** a team with CISO and lead-auditor practice (ISO 27001, 42001).

— HOW TO START

- 1**
Request access
Your own, separate tenant.
- 2**
Answer three questions
Company, package, size. Done.
- 3**
File your first report
Status for management on one page.

See your status.
