Security posture 59% making progress

Framework compliance

All frameworks are equal — no master, no hub. Equivalent controls share a control node (same-as); one answer counts automatically for all.

Go to Assessment

Framework	Controls	Applicable	Implemented	Partial	Not implemented	Percentage
NIS2	268 controls	241 applicable	97	94	50	60%
ISO/IEC 27001	318 controls	315 applicable	140	110		
EU AI Act	130 controls	108 applicable				46%
ISO 42001	111 controls	107 applicable				

PDCA CYCLE

Welcome to UniqSuite
Three questions, then you're ready.

Company Package Size

What do you need to demonstrate?

NIS2
Legal duty for important and essential entities.

ISO 27001
Certifiable information security management system.

NIS2 + ISO 27001
Both together — identical requirements are assessed once.

In addition (optional)

☒ EU AI Act
☐ ISO 42001 (AI management system)
☐ Cyber Resilience Act (products with digital elements)

< Back Next >

WHY UNIQSUITE

Compliance can be simple. It just has to be clear.

Germany's NIS2 Implementation Act has applied since December 2025. Management must implement and oversee the measures – and needs a status it can understand. UniqSuite turns hundreds of requirements into a guided path.

Simple

Ready in three questions.
Then one requirement per card – answered with one click: implemented, partial, not implemented.

Assess once

Equivalent requirements from NIS2, ISO 27001, the AI Act, ISO 42001 and the CRA share one answer. No duplicate work, no contradictions.

Audit-ready

Statement of Applicability, board, risk and implementation reports as PDF, Word or Excel – at the push of a button.

THE PATH – SIX PHASES IN THE PDCA CYCLE

01 · PLAN
Scope &
Context

02 · PLAN
Inventory

03 · PLAN
Gap Analysis

04 · PLAN
Risk Analysis

05 · DO
Plan &
Implementation

06 ·
CHECK/ACT
Audit & CI

Plus: management dashboard, policies, incident management, supplier check and AI governance.

HOW IT FEELS

Everything that matters. Nothing that distracts.

Assess requirement 89 open

Open only All

1 of 89

AT&T-A-81-1 MUST A-01

Is it ensured that no AI system is used to evaluate or classify natural persons over time on the basis of social behaviour or known, inferred or predicted personal or personality characteristics where the resulting score leads to detrimental or unfavourable treatment in unrelated social contexts or treatment that is unjustified or disproportionate (Article 5(1)(c))?

[Optional Internal policy: no social scoring of any kind.]

59% Security posture making progress

Framework compliance

All frameworks are input — not tested, no hub. Equivalent controls share a control node (same-nc). One answer counts automatically for every framework sharing that node (nested-link rule).

Go to Assessment

NIS2 265 controls - 241 applicable 60%

Implemented 97 Partial 84 Not implemented 90

ISO/IEC 27001 258 controls - 210 applicable 62%

Implemented 140 Partial 110 Not implemented 89

EU AI Act 100 controls - 100 applicable 46%

ISO 42001 171 controls - 107 applicable 60%

PLAN & IMPLEMENTATION

Who does what by when

One list of measures with owners, deadlines and status. Every step forward flows automatically into the dashboard and reports.

INCIDENT MANAGEMENT

Deadlines that keep running

Record an incident once. UniqSuite derives the reporting duties of your frameworks and starts the deadline timers – 24 hours, 72 hours, one month.

TRUST

- ✓ **Tenant separation in the database.** Row-level access rules keep every organisation's data apart.
- ✓ **Daily backups** with 14-day retention.
- ✓ **German and English** – interface and reports.
- ✓ **Two-factor sign-in**, can be made mandatory for administrators.
- ✓ **Rule-based, not a black box.** No AI decides your compliance status.
- ✓ **Built by practitioners:** CISO and lead auditor for ISO 27001 and 42001.

HOW TO START

1

Request access

Your own, separate tenant.

2

Answer three questions

Company, package, size – set up.

3

File your first report

Status for management on one page.

See your status.

Request access or book a short demo.
